Flutter app development:
Day #3
Making simple UI:

Code:

```dart
import 'package:flutter/material.dart';

void main() {
  runApp(myapp());
}

class myapp extends StatelessWidget {
  const myapp({super.key});

  @override
  Widget build(BuildContext context) {
    return MaterialApp(
        home: Scaffold(
      backgroundColor: Colors.purple.shade200,
      body:  SafeArea(
        child: Column(
          children: [
            SizedBox(height: 100,),
            const  Row(
              mainAxisAlignment: MainAxisAlignment.center,
              children: [
                Image(
                    height:80,
                    width: 80,
                    image: AssetImage('assects/logo.jpg')),
                Text(
                  "MY RIDE",
                  style: TextStyle(fontSize: 30, color:
Colors.black,fontFamily: 'pacifo'),
                  textAlign: TextAlign.center,
                ),
              ],
            ),
            const SizedBox(height: 50,),
            const Center(
                child: Text(
              "LOGIN",
              style: TextStyle(fontSize: 26, color: Colors.black),
            )),
             const SizedBox(
              height: 15,
            ),
            const Center(
```

```dart
            child: Text(
          "Please enter correct \nusername and password",
          style: TextStyle(fontSize: 16, color: Colors.black54),
          textAlign: TextAlign.center,
        )),
          const SizedBox(height: 20,),
        Padding(
          padding: EdgeInsets.only(left: 20,right: 20),
          child: TextFormField(
            decoration: InputDecoration(
              hintText: "Email",
              fillColor: Colors.purple[100],
              filled: true,
              prefixIcon: const Icon(Icons.email,color: Colors.black54,),
              focusedBorder: OutlineInputBorder(
                  borderSide:
                  BorderSide(color : Colors.black54),
                borderRadius: BorderRadius.circular(10)),
                enabledBorder: OutlineInputBorder(
                  borderSide:
                  BorderSide(color : Colors.black54),
                  borderRadius: BorderRadius.circular(10)),

            ),
          ),
        ),
          SizedBox(height: 30,),
        Padding(
          padding: EdgeInsets.only(left: 20,right: 20),
          child: TextFormField(
            decoration: InputDecoration(
              hintText: "Password",
              fillColor: Colors.purple[100],
              filled: true,
              prefixIcon: const Icon(Icons.lock,color: Colors.black54,),
              focusedBorder: OutlineInputBorder(
                  borderSide:
                  BorderSide(color : Colors.black54),
                  borderRadius: BorderRadius.circular(10)),
                enabledBorder: OutlineInputBorder(
                  borderSide:
                  BorderSide(color : Colors.black54),
                  borderRadius: BorderRadius.circular(10)),

            ),
          ),
        ),

          const SizedBox(height: 50,),
        Container(
          height: 50,
          width: 300,
           decoration: BoxDecoration(
              color: Colors.purple,
              borderRadius:BorderRadius.circular(10)),
```

```dart
            child:const Center(
              child:  Text(
                "LOGIN",
                style: TextStyle(fontSize: 26, color: Colors.white),
              ),
            ),
          ),
          const SizedBox(height: 20,),
          const Row(
            mainAxisAlignment: MainAxisAlignment.center,
            children:    [
              Text(
                "Don'nt have an account?",
                style: TextStyle(fontSize: 16, color: Colors.black54),
                textAlign: TextAlign.center,
              ),
              Text(
                "Sign up",
                style: TextStyle(fontSize: 16, color: Colors.red),
                textAlign: TextAlign.center,
              ),

            ],
          ),

        ],
      ),
    ),
  ));
  }
}
```
